

Currently, stronger COVID-19 measures are being implemented all over Kyoto Prefecture.

The number of new cases is not yet below that of the 3rd wave. Moreover, we are faced with the fear of new coronavirus variants.

Drink so much alcohol that you begin to forget about infection prevention measures. Talking without a mask. If we let these kinds of behaviors occur, the infection will once again spread and I will have to ask you once more to comply with stronger requests.

I truly appreciate the burden being placed on everyone who lives in Kyoto Prefecture, and to everyone who operates business here, but in order for this not to happen please be mindful so we don't experience a resurgence of the virus, and be considerate steps you take.

June 21st, 2021

NISHIWAKI Takatoshi

Governor of Kyoto Prefecture
