

Be cautious to avoid any risk of infection over the holiday season!

Infection cases of the new variant, the Omicron variant, have been detected in Kyoto Prefecture, and we have been taking measures to become more vigilant against the spread of the infection.

There is a concern that the infection risk associated with movement may increase over the holiday season more than usual on occasions such as dining with people you don't normally spend time with, attending a year-end or New Year party, homecoming travel, the first shrine or temple visit of the year. In order to keep living a new normal lifestyle with low infection risks, please be vigilant and avoid the risk of infection over the holiday season.

In order to avoid the infection risk over the holiday season

Please cooperate with the “Kyoto Manners” when eating and drinking!

- Dine at places with appropriate acrylic partitions and ventilation.
- Disinfect your hands before eating and after leaving a restaurant.
- Limit the time to 2 hours, and the group size to 4 or less per table.

※See the following basic rules under the “new normal lifestyle”.

- Wear a mask when talking.
- Do not speak in loud voices.

※Operating period from 23rd December 2021 till 15th January 2022

- **Stagger new year's homecoming and shrine visits to avoid crowds!**
- **Stay healthy and keep monitoring your health!**
- **Take a test if you have a doubt of being infected, but no symptoms!**

(Based on Special Measures Law, Article 24, Paragraph 9)

In order to keep continuing your new normal lifestyle without a risk of infection (Confirmed at the 57th Taskforce Headquarters Meeting, dated on 25th November)

Observe the following basic rules for “new normal lifestyle” in order to carry out our socio-economic activities while remaining vigilant against the spread of the infection.

- ① Please keep practicing basic prevention measures against the infection!
- ② Consult with a medical institution if you feel unwell!
- ③ Please be cautious when going out to avoid the risk of infection!
- ④ Do your best to reduce the risk of infection when eating and drinking!
- ⑤ If you wish to be vaccinated, please be proactive in doing so!
