

Greetings to everyone

This is Governor NISHIWAKI of Kyoto Prefecture.

There has been a sharp increase in new cases of COVID-19 these past few weeks.

To live our everyday lives while preventing infections, once again we must fully comply with the basic prevention measures such as “good indoor ventilation while air-conditioning is in use”, and “the wearing of a mask while speaking with others”.

For elderly people and those who have an underlying disease, please proactively receive a fourth vaccination to reduce the risk of becoming seriously ill.

I appreciate your understanding on this matter, and I would like to thank you all from the bottom of my heart for all of the support you continue to give.
